Measuring line: frame / proposed / existing _____

Largest handle or vent projection _____

Desired curtain or blind drop _____

Angles / bay depth (supplier method only) _____

End returns / curtain stack space _____

Product, curtain heading and weight _____

Fixing surface and notes _____

Before ordering

Ask the supplier to confirm corners, bend radii, returns, joints, supports, curtain load, pack contents and final order size. No cutting or bending allowances are included in this sheet.

For blinds, use the selected headrail depth and supplier corner method. A curved bay may need a template or survey. Confirm suitable fixings for the actual wall or ceiling.
